Creating a Quiz

Step 1: Make a New Quiz

One of the most powerful features of QuizBank50 is the ability to create and download your own quizzes using the Quiz Generator. To create a new quiz, select the Quiz Generator tab and click the “ADD” button.

Step 2: Search Questions

Once you have created a quiz, it's now time to decide what questions to add to the quiz. Go back to the Question Search tab and choose subjects you want the questions to cover.

Step 3: Add Questions to Your Quiz

After selecting a question, you can add it to your quiz by clicking “Add to Quiz” in the problem preview window and selecting your quiz.

Question: #include

Suppose that you can't recall the header file in which `toupper` is declared, and so you have to implement a version of the function yourself. Complete the implementation of `toupper` below in such a way that the function returns `c` in uppercase if `c` is a lowercase (ASCII) letter, else it returns `c` unchanged. Recall that the ASCII value of 'a' is greater than that of 'A'. You may not call any functions in your function.

```
char `toupper`(char c)
{
```

Show Answer

Subject Tags: functions, libraries, pointers
Question Type: Code Response
Released to Public: Yes
Authorship Year: 2012
Origin of Question: 2012 Quiz 0, 29
Points: 4
Difficulty: Easy (1.4737/3)
